SUMMARY

Software Engineer with 3 years of experience focused on frontend web development. Collaborated in cross-functional teams in agile environments, standing as a fast learner, flexible and focused professional. Looking forward to working on projects that embrace the web as a powerful platform, building performant and eye-catching web apps.

WORK EXPERIENCE

Globant — Web UI Developer

June 2021 - Present

I worked as staff augmentation for the following clients:

Autodesk — Design Systems Frontend Developer

July 2023 - February 2024 | May 2024 - Present

- Developing a React components library with TypeScript and Material UI (mui.com)
- Developed a Web Components library with Lit (lit.dev) and Shoelace (shoelace.style)
- Design Tokens implementation with CSS variables
- Documenting with Storybook
- Unit testing with Jest and React Testing Library

GoNoodle — Frontend Developer

February 2024 - March 2024

- Developed an educational content platform with Next.js 13, React 18, Tailwind CSS, React Query and custom hooks. Server Side Rendering (SSR)
- Blog with Static Site Generation (SSG) and Sanity CMS

LATAM Airlines — React Native Developer

July 2022 - February 2023

- React Native app for Android and IOS. Redux Observable and React Navigation
- Backend development with Node.js and Express
- Created the involuntary flight change section which allows passengers to choose a new flight from the app instead of contacting customer support
- Created and maintained components from the design system
- Implemented Firebase Analytics

Roundfeather — Frontend Developer

June 2021 - July 2022

- Developed a financial well-being web app with Vue.js and TypeScript
- Created reusable, responsive components and building a design system with Storybook
- Performed animations across the UI and styling with Tailwind CSS
- Wrote unit tests with Jest
- Performance optimization with caching techniques

Devlights — Fullstack Web Developer

February 2021 - June 2021

- Developed Node.js backend applications with Express and JWT authentication
- Designed and documented an API REST, with a MongoDB database
- Built frontend applications in React + Next.js + Redux, Sass, SVG and GSAP
- Performance and SEO optimization, web accessibility testing
